

TECHNICAL DATA: # ECOCELL PAPER WRAP

Product Description:

Ecocell Paper Wrap (honeycomb wrap) is an eco-friendly, recyclable packaging material designed to protect items during shipping. Its honeycomb structure provides excellent cushioning and flexibility, making it ideal for wrapping fragile items securely while reducing environmental impact. It features a unique hexagonal structure that expands as you stretch it. This design creates interlocking cells, offering enhanced cushioning and protection by evenly distributing pressure across the wrapped item.

Physical Properties:

Physical Properties	Unit	Standard	Test Method
Total thickness	Microns	125±5	GB/T 7125-1999
Elongation	%	1: 1.6	GB/T 7753-1987
Bursting strength	kN/m	3.6	GB/T454-1989
Color	Brown		
Thickness	80g		
Material	Kraft paper		
Roll size	380 mm		
Environment	24.8°C/78%		

Application:

widely used for protecting delicate items such as glassware, ceramics, electronics, and cosmetics during shipping. Its flexible structure allows it to conform to various shapes, ensuring a secure fit and reducing the risk of damage in transit.

Use:

simply unroll the desired length, stretch it to expand the honeycomb cells, and wrap it around the item. The interlocking structure secures the item in place without the need for additional tape.

Storage:

It's recommended to store in a cool, dry environment, ideally between 50°F to 77°F (10°C to 25°C). Keep it away from direct sunlight and moisture to preserve its integrity and strength. Ensure the storage area is clean and free from pests to maintain the material's quality.
