

TECHNICAL DATA: # WATER ACTIVATED KRAFT PAPER TAPE

Product Description:

Water-activated non-reinforced kraft paper tape is a green environmental protection product, and its base material and adhesive will not cause pollution to the environment and can be recycled and reused with the packaging. It is mainly used to replace pressure-sensitive adhesive tape, etc. Used for carton sealing.

Physical Properties:

Product Code	Standard	Metric	Test Method
Color	Natural		
Adhesion	Starch Adhesive		
Total thickness	4.7 mils	0.12mm	ASTM D - 3652
Tensile Strength MD	25 lbs/in	110 N/25mm	ASTM D-3759
Tensile Strength CD	13 lbs/in	60 N/25mm	ASTM D-3759
Backing	70 g/m2 Kraft paper		

Application:

Mainly used for international shipping packaging where high environmental standards are required, suitable for cartons' sealing and special packaging.

Storage & use:

Simply use a damp cloth or sponge to wet the adhesive surface (or the part of the object to be glued) and stick it immediately. It is not advisable to wipe too much or repeatedly. After pasting, press it immediately, or use a specialised kraft paper tape wetting machine in conjunction. It's recommended to store it in a clean and dry place. Damaged packaging shall be prevented and not stored with volatile solvents. The storage temperature shall be 4°C to 26°C, and the humidity shall be between 40% and 50%. Rotate inventory recommended.

Note: All information and recommendations are given by us in good faith based on practical experience, but without warranty. The user shall determine the suitability of the product and the method of application for each specific use
